

Bruno Marcuche

Site Reliability Engineer, AIOPs

Boulder, CO 80301 · 561-284-2441 · bmarcuche@gmail.com · linkedin.com/in/bruno-marcuche · resume.mindtunnel.org · github.com/bmarcuche

Summary

Site Reliability Engineer and technical leader who builds the systems other teams run on. I've scaled infrastructure across on-prem, hybrid, and cloud, and automated deployment and operations for thousands of Linux and Windows instances. Most recently I architected an internal AI agent platform, a custom semantic router orchestrating 16 specialized LLM agents, that has handled 10,000+ ops and engineering tasks and cut change lead time by ~89%. I lead ops and SRE teams, drive observability with OpenTelemetry and PagerDuty, and turn slow, manual operations into fast, repeatable automation. Open to both leadership and senior IC roles.

Professional Experience

03/2025 to present
Berwyn, PA

Operations Team Lead AssetWorks

- Architected and built an internal AI agent platform on the Model Context Protocol: 16 specialized LLM agents coordinated by a custom semantic router (fine-tuned sentence-transformer embeddings with pgvector knowledge retrieval). It handled 10,000+ routed ops and engineering tasks in its first 12 weeks across deployment, cloud, CI/CD, and incident response.
- Cut change lead time by ~89% after launch. Customer upgrades dropped from ~27 days to under 3 days, and provisioning of new environments from ~12 days to ~1.5 days, declining every month after going live (DORA lead time for changes).
- Delivered 235 Ansible and CI/CD pipelines built by the agents and automated 213 customer upgrade deployments, eliminating ~426 hours of manual deploy work, at 99.99% platform uptime.
- Designed multi-agent incident workflows that investigate and remediate across the fleet in a single session. They caught a bug that was deleting configuration fleet-wide and identified the root cause of an OS update and API regression that would otherwise take hours of manual log correlation.

12/2022 to 01/2025
Boulder, CO

Backend Developer, Founder
AdventureTrek

- Lead a team of five; drove an observability rollout (OpenTelemetry and Observe) to reduce MTTR and mentor engineers through 1:1s, training, and knowledge sharing.

07/2022 to 12/2022
Atlanta, GA

Site Reliability Engineering Manager
AnswerRocket

- Founded and led development of an educational game focused on outdoor exploration and biodiversity.
- Designed custom taxonomy GPTs for plant and animal classification.
- Built Python/FastAPI backend with MySQL and event logging.
- Managed CI/CD on GCP with GitHub Actions and internal tooling.

03/2016 to 07/2022
Alpharetta, GA

Site Reliability Architect
OfficeSpace Software

- Led remote SRE team (4 reports); ran weekly syncs and architecture reviews.
- Expanded Ansible coverage across AWS, cutting manual deploy time by 15%.
- Supported SOC 2 audit by automating cloud environment validation.

- Led SRE hiring, onboarding and 1:1s for a 3-person team.
- Built Slackbot enabling teams to deploy customer instances in under 10 minutes.
- Reduced deploy times over 60% via CI pipeline (CircleCI, Puppet, Docker, Terraform).
- Migrated infrastructure from Rackspace to GCP, saving \$60K annually.
- Owned production and staging infrastructure on GCP; managed OS patching, config management, release packaging, and automation with Puppet and Python.

2009 to 2016
São Paulo, Brazil

Sr. Technical Consultant / Team Lead
Hewlett Packard

- Delivered Tier 3 support for HP Server Automation; mentored junior engineers.
- Automated workflows by developing Python scripts utilizing the HPSA API.

- Ranked #1 in team for customer satisfaction.

Education

10/2001 to 12/2004
Ft. Lauderdale, Florida

Information Systems | Bachelor's Degree
ITT Technical Institute
(Honors Graduate)

Strengths

Leadership	AI-Led Ops
Cloud Infrastructure	Automation

Key Skills

CLOUD & AUTOMATION

GCP	Azure Cloud
Cloud Run	Terraform
Ansible	Docker

CI/CD & DELIVERY

GitHub Actions	Azure DevOps
Jenkins	

OBSERVABILITY

OpenTelemetry	Prometheus
PagerDuty	Observe

AI & AGENTS

LLM Agents	Model Context Protocol
pgvector	Hugging Face
Claude	

DEVELOPMENT & DATA

Python	Redis
Postgres	

SYSTEMS & SERVING

Linux	Nginx
-------	-------

Hobbies

Exploring AI tooling (LLMs,
MCP)

SRE meetups

Home lab experimentation with
Docker

Volunteering

07/2020 to 11/2024
Boulder, Colorado, USA

Delivery Driver / Wellness Check
Meals on Wheels Boulder

As a Meals on Wheels delivery driver, I got to enjoy great conversations with some of Boulder's greatest citizens.
